

ESTIMATING AND PRODUCTION ENGINEER

Whittaker Engineering (Stonehaven) Ltd have a fantastic opportunity for an Estimating and Production Engineer to join our team.

The candidate must have experience in a fabrication environment and at least five years' experience in estimating/pricing both large and small scale fabrication jobs, as the estimating team must cost jobs based on labour, material and time requirements.

The role covers a wide variety of fabrication work consisting of jobs for offshore platforms, FPSOs, drilling rigs, subsea tooling and onshore jobs.

The candidate must be capable of taking ownership of jobs to see the production process through to delivery, including maintaining strong client relations throughout. The role involves supporting existing clients and winning new work.

Excellent working conditions, remuneration package and benefits are available.

All applicants must be eligible to live and work in the UK and be willing to commute.

Please email your CV to hradmin@whittakereng.com.
