

Hydraulic Technician

Job Description

We are looking for an experienced Hydraulic Technician to join our team. The ideal candidate will have a thorough understanding of mechanical & hydraulic systems and components, as well as the ability to troubleshoot and repair any issues that arise. The successful candidate will also be responsible for installing, inspecting, and maintaining hydraulic systems on & offshore. This is a great opportunity for an individual who is looking to take their career to the next level. Offshore survival would be beneficial but is not essential as we can provide the training.

The ideal candidate will be expected to work with your own initiative or in a team and will be required to carry out a wide range of mechanical / hydraulic activities including faulting finding and be competent in reading detailed hydraulic schematics & mechanical drawings.

Responsibilities:

Carry out mechanical & hydraulic services as per below, in the workshop, on site or offshore

- Mechanical Fitting
- System Fault Finding
- Instrument Pipework
- Pressure Testing
- Hot Oil Flushing
- Equipment Overhaul

Ensure that all works are carried out in accordance with QHSE (Quality, Health, Safety and Environment) systems and all relevant standards are followed to always facilitate safe and effective operations.

Provide technical integrity for all project work and assure PTS Services are delivering a high standard which meets client, legislative and manufacturer's requirements.

As this is a client facing role it is always important to represent PTS in a professional manner

Further Information:

Working Hours: Monday to Thursday - 8.00am to 4.30pm, Friday -8.00am to 2.30pm

The role will also have some site work & offshore trips as required. Site & offshore allowance additional.

Company pension

Private medical

Basic salary between £34,000 & £41,000 depending on experience.
